

GOVERNMENTAL AGGREGATION

Resident-Focused Approach

Governmental aggregation is a complex process that can add great value to communities and community residents when executed correctly. Trebel, LLC is a leader in governmental aggregation consulting, and has the experience and knowledge to ask the right questions, lower risk, and assist community leaders in creating an aggregation program that benefits residents and lowers their energy costs.

“Trebel’s approach of placing residents first sold me on their program. Their commitment to educating our residents on aggregation exceeded my expectations. It was also very effective judging by the results on elections night.”

– Charlie Prince
Union Township Trustee

“The Trustees here in the Township are under constant scrutiny. We were pleased with Trebel’s ability to communicate with the residents and work directly with our County Prosecutor. Our residents received a discount double that which was available to them as individuals and all the Trustees are confident we made the right decision to hire Trebel.”

– Ron Bullard
Berlin Township Trustee

WHAT CAN TREBEL DO FOR YOUR COMMUNITY

- Trebel utilizes a resident-focused approach to ensure that your community is protected from unfavorable contract terms and conditions, change of law events, and market volatility.
- Trebel obtains bids from various suppliers through a true RFP process, whereas suppliers compete to provide an exclusive discounted rate for your community’s aggregation program.
- Trebel offers customized programs to meet your community’s individualized needs.
- Trebel provides specialized in-house customer service for your residents and community leaders prior to vote and for the life of the program.
- Trebel offers the most comprehensive community education process in the market to ensure your residents are making informed decisions at the ballot box and beyond.
